TOURNIQUET SYSTEMS & PRESSURE INFUSION
INDEX

ELECTRIC TOURNIQUETS ............................................................ 4-9
COMPRESSED AIR TOURNIQUETS ........................................ 10-11
TOURNIQUET CUFFS & ACCESSORIES ..................................... 13-15
BLOOD EXSANGUINATION ...................................................... 16-17
PRESSURE INFUSION CUFFS & ACCESSORIES ....................... 18-24
AUTOMATIC PRESSURE INFUSORS ........................................ 25

Find our full range of products on www.vbm-medical.de.
TOURNIQUETS

- electric
- digital pressure display
- battery back-up system

Pressure Regulation
- microprocessor controlled
- fast cuff inflation and deflation
- regulator knob allows very precise regulation
- limits pressure to max. 600 mmHg

Digital Display
- large color coded LED display is easy to read
- precise measuring shows actual cuff pressure

Battery Back-Up System
- long lasting Ni-MH battery

Flush Button
- to check for bleeding
- for intermittent release of local anesthetic after I.V. Regional Anesthesia

Color Coded Extension Hoses
- detachable from the device
- with positive locking connectors (PLC)

Automatic Timer
- automatic reset and start after inflation
- automatic stop after deflation with indication of elapsed inflation time
- audible and visual signal every 30 minutes

Alarm System
- visual and audible alarm to detect leaks, pressure deviations and low battery voltage

Built-In Data Port
- supports optional printer for patient report
- reports cuff pressure adjustments and total elapsed cuff inflation time on a self-adhesive label

ELECTRIC TOURIQUETS

Tourniquet 8000
• bloodless field

Tourniquet 9000
• bloodless field
• I.V. Regional Anesthesia
• bilateral surgery

ACCESSORIES

Printer with fixation plate for stand
complete with one roll printer labels (930 pcs. / roll)
REF 13-10-100

Printer
complete with one roll printer labels (930 pcs. / roll)
REF 13-10-000

Roll of printer labels
(930 pcs. / roll)
REF 13-10-001
TOURNIQUETS

- electric
- analog pressure display
- manual back-up system

Pressure Regulation
- fast cuff inflation and deflation
- regulator knob allows very precise regulation
- limits pressure to max. 600 mmHg

Analog Manometer
- no flickering during pressure settings
- always shows the real pressure in the cuff
- calibrated precision manometer

Manual Back-Up System
- automatic change to manual system during failure of compressed air
- maintenance free
- can be used at any time even without power

Flush Button
- to check for bleeding
- for intermittent release of local anesthetic after I.V. Regional Anesthesia

Color Coded Extension Hoses
- firmly connected to the device
- with positive locking connectors (PLC)

Manual Timer
- countdown function with audible signal
- timer function

TOURNIQUETS

• compressed air
• analog pressure display
• manual back-up system

Pressure Regulation
• pneumatic precision pressure regulator
• fast cuff inflation and deflation
• regulator knob allows very precise regulation
• limits pressure to max. 600 mmHg

Analog Manometer
• no flickering during pressure settings
• always shows the real pressure in the cuff
• calibrated precision manometer

Manual Back-Up System
• automatic change to manual system during failure of compressed air
• no battery needed
• maintenance free
• can be used at any time even without compressed air

Flush Button
• to check for bleeding
• for intermitted release of local anesthetic after I.V. Regional Anesthesia
• allows deflation in manual mode

Color Coded Extension Hoses
• firmly connected to the device
• with positive locking connectors (PLC)

Manual Timer
• countdown function with audible signal
• timer function

**for single use, Material: Polyisoprene (PI)**

**THREE CHAMBER BLOOD EXSANGUINATION GARMENT**

Due to the three chamber-system the garment is inflated automatically from distal to proximal. With the 3 position zipper the garment can be adjusted to fit different size extremities for efficient exsanguination of the patients limb. Sleeve and bladder are exchangeable.

Automatic exsanguination for use with VBM Tourniquets 2800, 5000 and 5800.

Arm

REF 20-13-341

Leg

REF 20-13-343
VBM INFUSOR (500 ml / 1000 ml / 3000 ml)

Pressure Infusion Cuff for rapid pressure infusion and irrigation purposes.
Reusable

completely transparent
• allows clear view on the fluid bag and the fluid level
• 360° visible

Wrap-Around Design with hook
• fluid bag can be replaced quickly and easily
• consistent pressure on the complete fluid bag

Manometer
• pressure proved
• precise pressure range from 0-300 mmHg

Hand Inflator
• large volume allows quick inflation

Three-Way Stop Cock
• for pressure control
• for quick deflation

Reusable
• easy to clean (PU material)
• latex free

AUTOMATIC PRESSURE INFUSORS

For the use with pressure infusion cuffs for automatic irrigation purposes during minimal invasive surgery.

Precision Pressure Regulator
• very precise pressure regulation
• maintains selected pressure and guarantees automatic compensation
• limits pressure to max. 300 mmHg

Protection Cover
• protects the device from liquid and damage

Coil Extension Hose
• firmly connected to the device
• with male Luer Lock connector

Universal Clamp
• horizontal or vertical position for attachment to drip stand or rail

Pressure Infusor 100
for compressed air
with single channel, complete with pressure hose (400 cm / 13 ft.)
